

# CS-201: Object Oriented Programming

## Lab 1 – Week 1

### ***Lab Objectives:***

- Understand class structure
- Practice object creation
- Observe constructor and destructor behavior

### ***Lab Tasks:***

**Task 1:** Create a Student class with private data members and public member functions.

**Task 2:** Instantiate multiple objects and initialize them using constructors.

**Task 3:** Add a destructor and observe output order.

### ***Evaluation Criteria:***

- Correct use of OOP concepts (40%)
- Code clarity and formatting (30%)
- Correct execution and output (30%)
